

Celebrating
21 Years
Of Excellence
1992-2013

Mr. Gilbert Duran, President, founded Duran Construction in California in 1992 to provide local commercial, institutional, and residential roadway services. Since its inception Duran Construction has expanded to also offer military and government services through the Small Business Association 8(a) program. Our paving and asphalt work is quite extensive and entails more than just roadways. In addition to asphalt paving projects, we also engage in grading and earthmoving projects, such as the construction of embankments and retaining walls, demolition, plus we can install a wide variety of concrete structures, from parking surfaces to utility and drainage pipes to curbs and islands. We also offer services such as design-build commercial, office and residential buildings.
